PROFESSIONAL EXPERIENCE

Mad.io

November 2017 - current (Barcelona)

Frontend Developer - UI/UX Designer

MAD is a digital entertainment company with a big focus on VR technologies. My work is not only to design (UI-UX) and develop our products websites/web-apps but also working on motion design, VR web integration, a/b testing, user journey, accesibility, analysis, performance as well as SEO and creation of product videos for new upcoming products.

Runroom.com

April 2015 - August 2017 (Barcelona)

Frontend Developer - UI/UX Designer

Developed web projects from small to big clients such as Mesoestetic, Hospital Sant Joan de Deu, Capside, Eroski. Worked with Twig, Drupal, Gulp-Grunt, Sass, Atomic Design, Wordpress, SVG Animation, UI-UX, Agile, Javascript and Newsletters.

Otogami.com

April 2014 - March 2015 (Madrid)

Frontend Developer - UI/UX Designer

An online videogame finder founded by David Bonilla. Otogami's idea was to create the most informative video game finder at the best price possible around the world. I worked as a freelance in this project and developed the site as a 3 member startup with some friends, a lot of work and some hard working nights.

Runnics.com

April 2014 - March 2015 (Madrid)

Frontend Developer - UI/UX Designer

Twin sister of Otogami. Running shoe searcher and a place where the user has all the tools and updated information of the 'running' world. Combined this project with Otogami´s as a freelance developer/designer.

Deiser.com

April 2012 - March 2015 (Madrid)

Frontend Developer - UI/UX Designer

Experts in plugin development for Atlassian and faithful followers of Agile. My work was around the code + design of the corporate website, landings and newsletters. image design for Atlassian plugins, complete corporate online management, design and video production of Atlassian plugin products.
